# Figure S3

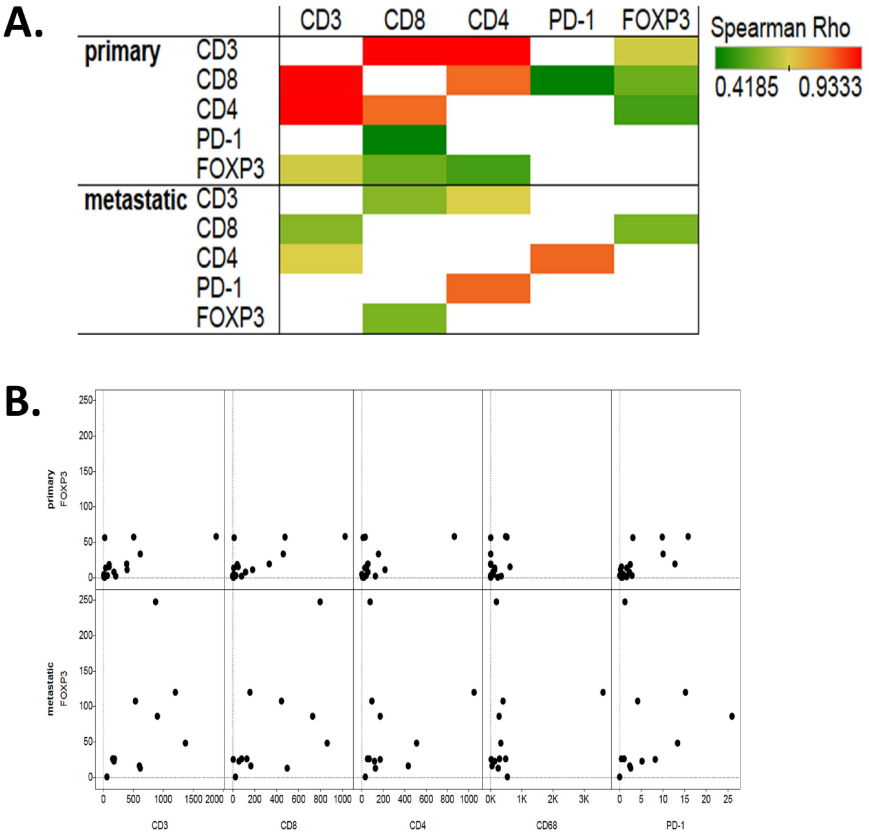

**Figure S3. Correlation between different infiltrates in primary and metastatic UM tumors in primary and metastatic tumors. (A) Color boxes show all significant correlations (p<0.05) between different infiltrates. Color represents the level of Spearman Rho. (B) Scatterplots representing the correlation of FOXP3 levels and other infiltrates (CD3, CD8, CD4, CD68, or PD-1) in primary and metastatic tumors from individual patients.**
