Supplementary Table 1. List of 8,953 genes with a sinusoidal expression pattern in LD.

Expression levels of genes, identified by RAIN (adjusted *p*-value < 0.05) throughout the 24 hour- cycle in LD regime, are shown. [a] Probe ID: ID of probe sequence in "Krill 2.0" Agilent microarray platform; [b]ID: accession number of krill master transcriptome [23];
[c]*p*-value: RAIN Benjamini-Hochberg adjusted *p*-value; [d]Period: period of oscillation; [e]Phase: maximum peak of expression throughout the 24 hour-cycle; [f]EBI ID: accession number of EBI; [g]Annotation = description of the gene; [h]GO term: gene ontology biological process;
[i]GO child term: most fitting gene ontology child term to further refine the functional annotation; [j]e-value: score of GO functional annotation with BLASTnGO; [k-m]mRNA expression levels.
