Table S11: List of Genes with a LOW Expression in *ARMC5*-Mutated Compared with *ARMC5* Wild-Type ACTH-Independent Macronodular Adrenal Hyperplasia

[1.] p-values were generated with Limma, and adjusted for multiple testing using the Benjamini- Hochberg correction

[2]. GO stands for Gene Ontology. The significantly enriched Gene Ontologies (GO.1 to GO.20) within the differentially expressed genes are presented, with their annotations and the p-value of their enrichment (generated by DAVID). Whether any of these GO annotations applies to a gene or not, is mentioned for all the genes ("Yes" or "No").

To access the content of the table, please double-clic on the table
