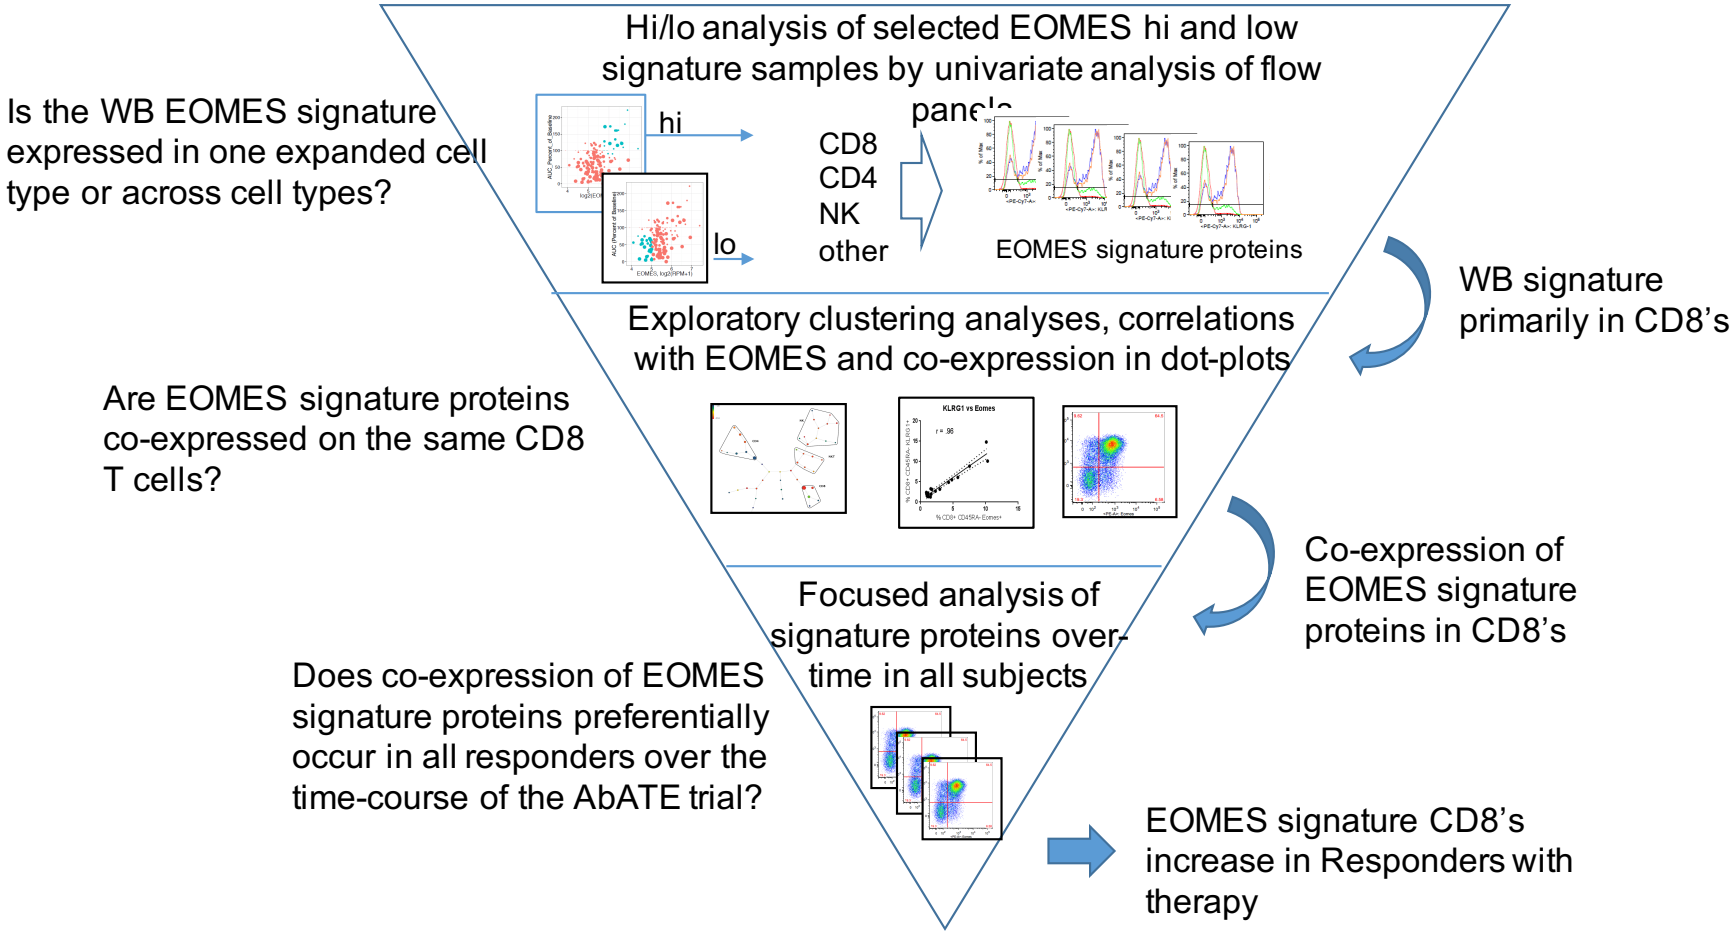
Figure S6



Hi/lo analysis of selected EOMES hi and low signature samples by univariate analysis of flow panels
Is the WB EOMES signature expressed in one expanded cell type or across cell types?
hi
lo
CD8
CD4

other
EOMES signature proteins
WB signature primarily in CD8's
Exploratory clustering analyses, correlations with EOMES and co-expression in dot-plots
Are EOMES signature proteins co-expressed on the same CD8 T cells?
Co-expression of EOMES signature proteins in CD8's
Focused analysis of signature proteins over-time in all subjects
Does co-expression of EOMES signature proteins preferentially occur in all responders over the time-course of the AbATE trial?
EOMES signature CD8's increase in Responders with therapy
