Corrigendum to: Prognostic implication of premature ventricular contractions in patients without structural heart disease

This is a corrigendum to: Raffaele Scorza, Martin Jonsson, Leif Friberg, Mårten Rosenqvist, Viveka Frykman, Prognostic implication of premature ventricular contractions in patients without structural heart disease, *EP Europace*, 2022, euac184, <https://doi.org/10.1093/europace/euac184>

In the originally published version of this manuscript, Table 2 contained incorrect values. In Table 2 (Baseline characteristics of the secondary analytic sample), on the rows "Ischemic heart disease, n(%)" and "Heart Failure, n (%)", the values should be 0 (0.0) instead of 820 (100.0) both under "PVC cohort" and "controls".

This error has been corrected online.
