

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Correction to *Lancet Child Adolesc Health* 2021; published online March 10. [https://doi.org/10.1016/S2352-4642\(21\)00066-3](https://doi.org/10.1016/S2352-4642(21)00066-3)

Bhopal SS, Bagaria J, Olabi B, Bhopal R. *Children and young people remain at low risk of COVID-19 mortality*. *Lancet Child Adolesc Health* 2021; published online March 10—In this Correspondence, the reported numbers of COVID-19 deaths in Spain were based on data from the Spanish Ministry of Health, Consumer Affairs and Social Welfare (MSCBS) and National Network of Public Health Surveillance (RENAVE). Since publication, errors in the MSCBS and RENAVE data were identified and corrected. The corresponding data in the main text, table, and appendix of this Correspondence have been updated. The corrections have been made to the online version as of March 24, 2021, and will be made to the printed version.

Correction to *Lancet Child Adolesc Health* 2021; 5: 190–200

Teoh LJ, Solebo AL, Rahi JS. *Visual impairment, severe visual impairment, and blindness in children in Britain (BCVIS2): a national observational study*. *Lancet Child Adolesc Health* 2021; 5: 190–200—For this Article, the British Childhood Visual Impairment and Blindness Study Interest Group list has been updated and the percentage of children in Table 4 with sporadic or uncertain prenatal hereditary visual impairment, severe visual impairment, or blindness should have been 28%. These corrections have been made to the online version as of April 14, 2021.

Correction to *Lancet Child Adolesc Health* 2021; 5: 295–303

Jourdan D, Gray NJ, Barry MM *et al*. *Supporting every school to become a foundation for healthy lives*. *Lancet Child Adolesc Health* 2021; 5: 295–303—In this Viewpoint, Prof M M Barry's institution was changed to 'IUHPE-UIPES at School of Public Health, Université de Montréal, Montréal, QC, Canada' and 'WHO Collaborating Centre for Health Promotion Research, School of Health Sciences, National University of Ireland Galway, Galway, Ireland', and M Y Farmer's institution was changed to 'NCD Child at Centre for Global Child Health, The Hospital for Sick Children (SickKids), Toronto, ON, Canada'. These corrections have been made to the online version as of April 14, 2021.
