Fig. 10.2 of the article cited above provides recommendations for the treatment of confirmed hypertension in people with diabetes. Due to a composition error, the initial blood pressure range for the left side of the algorithm was given as $\geq 140/90$ and $< 160/100$ mmHg; the correct initial blood pressure range is $\geq 130/80$ and $< 160/100$ mmHg.

The online version of the article (<https://doi.org/10.2337/dc23-S010>) has been updated to correct the error.
