Correction to: Hernia

<https://doi.org/10.1007/s10029-021-02545-y>

The statistical analyses showed that smoking was a significant risk factor for CPIP after *both* open anterior mesh repair and after endo-laparoscopic repair, which is correct reported in Table 3 and Table 4.

In the Discussion section however, smoking habit is discussed as “a risk factor for chronic pain after endo-laparoscopic repair *but not* after open anterior mesh repair.” in our published paper.

The original article has been corrected.
