(Molecular Therapy 24, 261–275; 2016)

This article has been retracted at the request of the editor-in-chief. Similarities were found between images in this article and an article in *Oncotarget* (Pu et al., 2015, *Oncotarget* 6, 40775–40798, <https://doi.org/10.18632/oncotarget.5905>) previously published by the same authors. Similarities were also found between images within this article. Image analysis performed by the editorial office confirmed findings of image reuse in Figures 2E and 6E of the *Molecular Therapy* article. Some of the original data provided by the authors do not match the published article. This reuse (and in part misrepresentation) of data without appropriate attribution represents a severe abuse of the scientific publishing system. No authors responded to the notice of retraction. The original email was undeliverable to 6 authors (not including the corresponding author; T.L., Q.Z., J.A., M.W., H.L., X.G.).
