

Corrigendum

Ultra-processed foods have the worst nutrient profile, yet they are the most available packaged products in a sample of New Zealand supermarkets – CORRIGENDUM

Since publication of the manuscript, we made a correction to Table 5:

Table 5 Number of product varieties and manufacturers per food sub-category for 13,406 packaged foods available for sale in NZ supermarkets in 2013

Food sub-category	N products	Top 2 manufacturers	Brands owned by manufacturer	Produced N products	% of total products
Breakfast cereals	311	Sanitarium	1	42	13.5
		Kellogg's	1	41	13.2
Biscuits	696	Campbell's	1	121	17.4
		Griffins	3	104	14.9
		Mondelèz/Kraft	9	189	26.9
Chocolates & sweets	703	Nestlé	3	66	9.4
		Heinz	1	28	9.5
Ready meals	294	Hansells	2	21	7.1
		Coca Cola	3	67	24.5
Soft drinks	274	Pepsi Co	4	28	10.2
		Pepsi Co	6	99	22.9
Crisps & snacks	433	Griffins	2	65	15.0

Aligned with this correction, we updated the text under the heading '**Product and brand variety**'; which should state:

For example, 311 breakfast cereal products were available, of which 83 (26.7%) were produced by two food manufacturers, Sanitarium and Kellogg's. Likewise, we observed 703 varieties of chocolates and sweets (6.3% of all ultra-processed food); 255 of these (36.3%) were produced by two food manufacturers, Mondelèz/Kraft and Nestlé. Mondelèz/Kraft produced these chocolates and sweets under nine different brands. 274 products were categorized as soft drinks and divided into two sub categories: sugar-free (44) and sugar sweetened (230). 95 (34.7%) soft drinks were products by two food manufacturers, Coca Cola and Pepsi Co.
