Retracted: “CDK14 expression is elevated in patients with non-small cell lung cancer and correlated with poor prognosis”

At the request of the Journal Editor and Sage, the following article has been retracted:

Yang Y, Yuan G, Xie H, et al. CDK14 expression is elevated in patients with non-small cell lung cancer and correlated with poor prognosis. *Journal of International Medical Research*. 2021; 49(10). doi:10.1177/03000605211013199

The authors contacted Sage after the publication of their article to request the addition of new authors.

Upon investigation, Sage became aware that the submission contains indicators of third-party involvement.

This article has been retracted due to our concerns over the legitimacy of the author byline as well as overall concerns about the integrity of the research.

The authors did not respond for comment.
