## MicroRNA 628 Suppresses Migration and Invasion of Breast Cancer Stem Cells through Targeting SOSI [Retraction]

Lin C, Gao B, Yan X, et al. Onco Targets Ther. 2018;11:5419-5428.

The Editor and Publisher of *Onco Targets and Therapy* are retracting the published article. Concerns were raised following the authors request to correct an error in Figure 6. It was found that images in Figure 3D and 6C had been duplicated. Specifically,

- The image for Figure 3D, MCF-7, miR-628 has been duplicated with the image from Figure 6C, MCF-7, miR-628 +pcDNA.
- The image for Figure 6C, MCF-7, miR-628+pcDNA has been duplicated with the image from Figure 6C, MCF-7, miR-628+pcDNA-SOS1.

The authors responded to our follow up queries but were unable to provide a satisfactory explanation for the duplicated images. Additionally, the authors explained they could only provide partial data for their study due to the elapsed time since study completion. As the findings could not be verified the Editor and Publisher made the decision to retract the article and the authors agreed with this.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

## Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
