<https://doi.org/10.2337/db23-er08a>

In Table 2 of the article cited above, the univariable MR analyses for microalbuminuria were erroneously cited as inverse variance weighted analyses. The row headings in Table 2 have been revised to show the correct analyses performed: MR-Egger, weighted median and mode, and simple mode analyses.

In Fig. 3, the confidence intervals were erroneously plotted as error bars. Fig. 3 has been updated with the correct confidence intervals from the text.

The revised online version of the article can be accessed at <https://doi.org/10.2337/db22-0696>.
