# Author Correction: The antimicrobial capacity of *Cistus salviifolius* and *Punica granatum* plant extracts against clinical pathogens is related to their polyphenolic composition

Francisco Javier Álvarez-Martínez, Juan Carlos Rodríguez, Fernando Borrás-Rocher, Enrique Barraión-Catalán & Vicente Micol

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-020-80003-y>, published online 12 January 2021

The original version of this Article contained errors in the values of total phenolic content.

As a result, in the Results section, under the subheading ‘Phenolic content and HPLC–MS molecular characterization of the extracts’,

“The CS extract showed a total phenolic content of  $60.1 \pm 5.5$  mg GAE/g extract. In contrast, the GP extract showed a lower total phenolic content with  $35.9 \pm 2.5$  mg GAE/g extract.”

now reads:

“The CS extract showed a total phenolic content of  $60.1 \pm 5.5$  g GAE/100 g extract. In contrast, the GP extract showed a lower total phenolic content with  $35.9 \pm 2.5$  g GAE/100 g extract.”

The original Article has been corrected.
