(Molecular Therapy: Nucleic Acids 10, 438–449; March 2018)

In the originally published version of this article, the western blot bands of 53BP1 and Chk2 contained the same GAPDH bands. In Figure 6D, the GAPDH bands were repeated, and this inaccurate image display can lead to ambiguous interpretation. These three protein markers were completed at the same time of western blot. A revised Figure 6 displaying electrophoresis bands of 53BP1, Chk2, and GAPDH is included below, and the interpretation of the results and conclusion of this article remain unchanged.

The authors apologize for this error and any confusion this may have caused.
