(Molecular Therapy: Nucleic Acids 24, 1012–1023; June 2021)

This article has been retracted at the request of the authors and editor-in-chief. An investigation was conducted after the authors contacted the editorial office for withdrawal of this article. The editor-in-chief has been made aware that this article is included in a list of suspected paper mill papers (<https://docs.google.com/spreadsheets/d/149EjFXVxpwkBXYJOnOHb6RhAqT4a2llhj9LM60MBffM/edit>) due to similarities between the western blots in this article and other suspected paper mill papers. These concerns were initially posted in a Pubpeer thread: <https://pubpeer.com/publications/CC81A2EB8A7331F55700B2F5F83FDE>. Given these issues, the editors have lost faith in the findings presented in the article. The authors agree to the retraction.
