

Correction: *Can I go home now? The safety and efficacy of a new UK paediatric febrile neutropenia protocol for risk-stratified early discharge on oral antibiotics*

Jackson TJ, Napper R, Haeusler GM, *et al*. Can I go home now? The safety and efficacy of a new UK paediatric febrile neutropenia protocol for risk-stratified early discharge on oral antibiotics. *Arch Dis Child* 2023;108:192-197. doi: 10.1136/archdischild-2021-323254

The authors have noted a discrepancy between a value in the abstract and the main body of the text and confirm that the value in the abstract is correct. The incorrect sentence in the results is: 'Forty-eight per cent low-risk (AUS 0–1) homecare eligible episodes were discharged within 24 hours, compared with 2% AUS 0–1 but homecare ineligible.'

It should be as follows: 'Forty-six per cent low-risk (AUS 0–1) homecare eligible episodes were discharged within 24 hours, compared with 2% AUS 0–1 but homecare ineligible.'

This change in value from 48% to 46% does not affect any of the conclusions in their paper.
