Structure–Uptake Relationship Study of  
DABCYL Derivatives Linked to Cyclic Cell-  
Penetrating Peptides for Live-Cell  
Delivery of Synthetic Proteins

It has come to the author's attention that an editing error resulted in an incorrect mass range shown in the baseline of the spectra in three figures in the Supporting Information (Figures S14–S16). A mistake in the HRMS data of compound **D11** was also found. The revised Supporting Information file available online along with this Corrigendum corrects these errors. These corrections do not alter the conclusions of the published work.
