Hsp70 mutant proteins modulate additional apoptotic pathways and improve cell survival. *Cell Stress & Chaperones* 2004 **9** (3): 229–242.

Figure 5D, page 237, is incorrect. It should contain images of 9 protein models for Hsp70.WT (a, d, g), Hsp70.Q (b, e, h), and Hsp70.QG (c, f, I). The correct version of Figure 5D can be found in the online version of *Cell Stress & Chaperones*.
