## REASON FOR WITHDRAWAL FROM PUBLICATION

The 'Methods of vascular occlusion for elective liver resections' review is withdrawn with Issue 1, 2009 of the Cochrane Library because of the large volume of information it contained. The review is split into three new reviews, ie, 'Ischaemic pre-conditioning for liver resections performed under vascular occlusion'; 'Vascular occlusion for liver resections', and 'Methods of vascular occlusion for elective liver resections'. The present reviews are also updated and are published in Issue 1 2009 of The Cochrane Library.

The editorial group responsible for this previously published document have withdrawn it from publication.

## WHAT'S NEW

Date	Event	Description
21 October 2008	Review declared as stable	Withdrawn because the review is split into three separate reviews.

## HISTORY

Protocol first published: Issue 1, 2007

Review first published: Issue 4, 2007

Date	Event	Description
21 October 2008	Amended	Converted to new review format.
