

CORRIGENDUM

Cadmium inhibits mismatch repair by blocking the ATPase activity of the MSH2–MSH6 complex

Sreeparna Banerjee and Hernan Flores-Rozas

Nucleic Acids Res. (2005) **33**, 1410–1419.

The authors would like to apologize for an error in Figure legend 1c. The curves were mislabeled. The corrected Figure legend 1c is given below.

(c) Time-course study over 120 min pre-incubation of the ATPase activity of MSH2–MSH6 (160 nM) in the presence (open triangles) and the absence of Cd²⁺ (closed squares). The average of three experiments for each time point is presented. Standard deviation is included. Curves were fitted by linear regression analysis.
