(iScience 24, 102791; July 23, 2021)

In the originally published version of this article, the micro-CT 3D images of “SKG+Ceapin-A7” in Figure 6F were mistakenly added, using “control” group images, and the micro-CT 2D images of “control” in Figure 6G were mistakenly added, using “SKG+Ceapin-A7” group images. This mistake arose during the figure preparation of the final version of the manuscript. These changes do not affect the final conclusions of the manuscript. The authors apologize for any confusion caused to the reader.
