Error in Figure

The authors wish to make the following corrections to the original publication [1]. The authors regret that an error was found in Figure 3 of the above article. We noticed mistake in the orientation of confocal laser scanning microscope (CLSM) images of *S. aureus* biofilm in Figure 3. The following figure shows corrected CLSM 2D images (Figure 3e–h) with their respective 3D images (Figure 3i–l). The correct version of Figure 3 appears below:

Figure 3. Microscopic examination of biofilm: Light microscopy images of *S. aureus* biofilm (a) untreated, and treated with (b) CNPs, (c) chrysin and (d) CCNPs, showing dispersion in biofilm formation. CLSM 2D images (e–h) and 3D images (i–l) showing bacterial biofilm untreated, and treated with CNPs, chrysin and CCNPs, respectively.

We stress that these errors were purely due to human error and oversight; the corrections made do not affect or change the written portion of the figure legend, the interpretation

of the results or the final conclusions of this manuscript. The authors would like to apologize for any inconvenience caused and state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
