## Correction: Intensive Care Med (2023) 49:1327–1338

<https://doi.org/10.1007/s00134-023-07225-2>

When the article was published, the Result-section of the Abstract was given in a misleading wording. Instead of “Absence of acquired immune deficiency syndrome (AIDS), non-cancer-related immune deficiency, liver failure, male sex, septic shock, and bleeding at ICU admission were associated with the development of thrombocytopenia during ICU stay”.

it should read

“Non-AIDS-, non-cancer-related immune deficiency, liver failure, male sex, septic shock, and bleeding at ICU admission were associated with the development of thrombocytopenia during ICU stay.”

The Original publication has been corrected.
