Correction to: Current Atherosclerosis Reports

<https://doi.org/10.1007/s11883-023-01186-z>

The original version of the article contained a typo in Figure 3 (mistaken reversal of the place of images). On the left side of Figure 3, in the "preventive approach," atherosclerotic lesions in the control group should be "severe atherosclerosis lesion," while in the vaccinated group it should be "moderate atherosclerosis lesion." The image of the cross-section of the vessel affected by atherosclerosis has been corrected and the explanations have been improved.

The original version has been corrected.
