⁶These authors contributed equally: Ying Zhang, Yun Bai, Xiao-Xuan Ma.

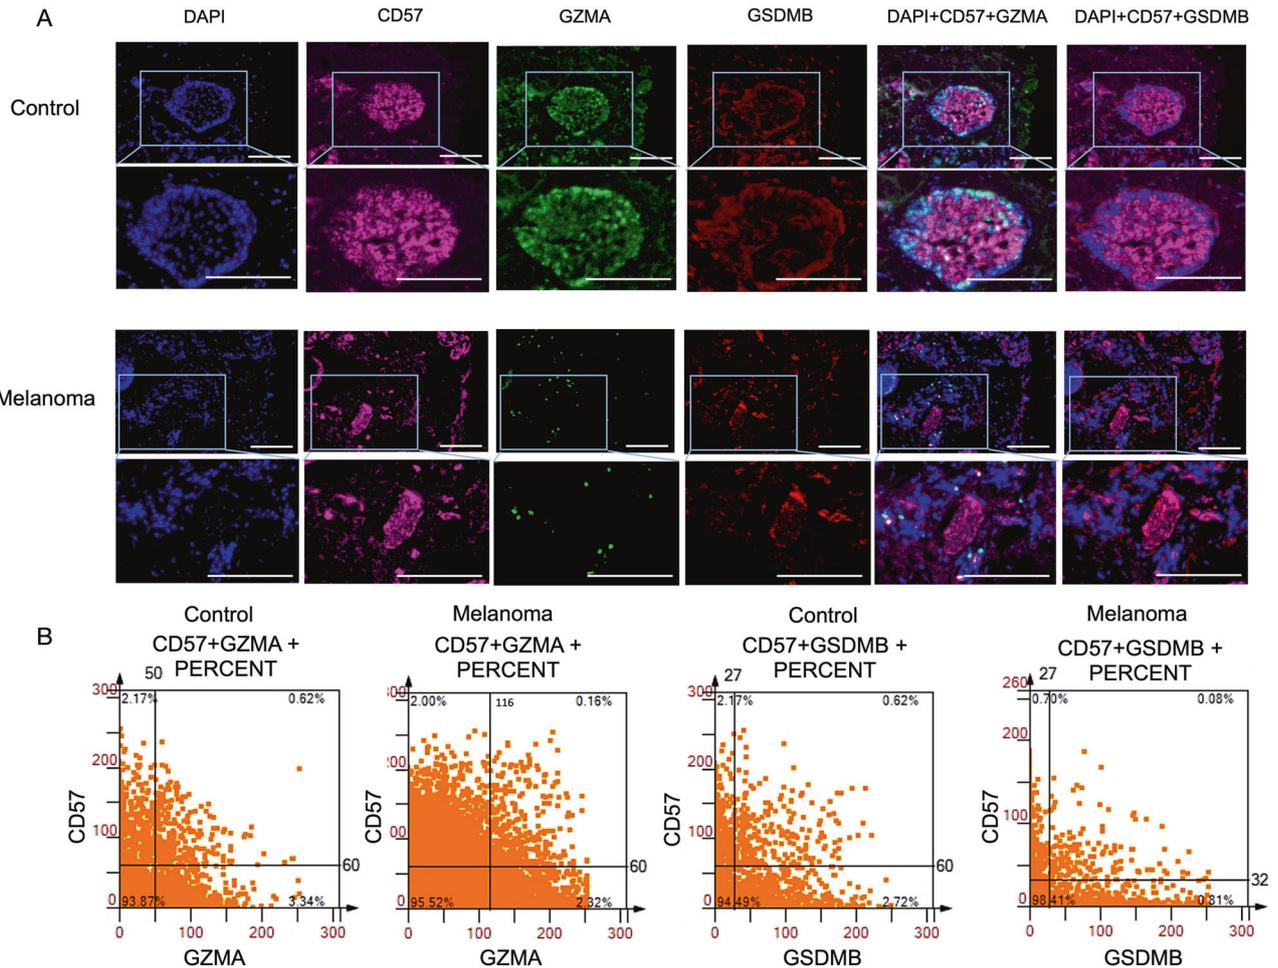

Fig. 7 .

In order to maintain consistency with the main text, the legend of Fig. 7 “GZMA⁺ cells and GSDMB⁺ cells are secreted by NK T cells” should be corrected as “GZMA⁺ cells and GSDMB⁺ cells are secreted by NK cells”. In accordance with the figure and its context, the legend of Fig. 7B “The scattergrams of different CD8⁺GZMA⁺, CD8⁺GSDMB⁺, CD57⁺GZMA⁺, and CD57⁺GSDMB⁺ percent cells among the whole sample” should be modified as “The scattergrams of different CD57⁺GZMA⁺ and CD57⁺GSDMB⁺ percent cells among the whole sample”.

Following the citation of Fig. 7B on page 10, “Conversely, the expression of GZMA in CD57⁺ T cells within melanoma specimens was minimal” would better be changed to “Conversely, the expression of GZMA in CD57⁺ cells within melanoma specimens was minimal”.

There was a slip of the pen in the first sentence of Discussion section that “Histologically, melanoma tissues had fewer positive cells percentage of PRGs, GZMA, GSDMB, NLRP1, IL18, and NLRP1 in epidermal than in normal skin” should be changed into

“Histologically, melanoma tissues had fewer positive cells percentage of PRGs, GZMA, GSDMB, NLRP1, IL18, and CHMP4A in epidermal than in normal skin”.

The original article has been corrected.
