## Corrigendum: Phosphorylation of SRSF1 by SRPK1 regulates alternative splicing of tumor-related Rac1b in colorectal cells

VÂNIA GONÇALVES, ANDREIA HENRIQUES, JOANA PEREIRA, ANA NEVES COSTA, MARY PAT MOYER, LUÍS FERREIRA MOITA, MARGARIDA GAMA-CARVALHO, PAULO MATOS, and PETER JORDAN

In the above-mentioned article, the authors were made aware of western blot panel duplication issues in Figures 3A and 5A.

The original western blot images were shared with the editors and revealed issues associated with the process of assembling the multilayer figures: a cropping error with one of the AKT panels in Figure 3A, and two of the SRPK1 and  $\alpha$ Tub panels from Figure 3A that were carried over by mistake into Figure 5A. Based on the original data, the corrected versions of Figures 3 and 5 have been published online.

The authors apologize for these errors but note that they do not change the conclusions drawn from the data.
