

## Correction for Rasmussen et al., “Virology—the path forward”

Angela L. Rasmussen, Gigi K. Gronvall, Anice C. Lowen, Felicia Goodrum, James Alwine, Kristian G. Andersen, Simon J. Anthony, Joel Baines, Arinjay Banerjee, Andrew J. Broadbent, Christopher B. Brooke, Samuel K. Campos, Patrizia Caposio, Arturo Casadevall, Gary C. Chan, Anna R. Cliffe, Donna Collins-McMillen, Nancy Connell, Blossom Damania, Matthew D. Daugherty, Kari Debbink, Terence S. Dermody, Daniel DiMaio, W. Paul Duprex, Michael Emerman, Denise A. Galloway, Robert F. Garry, Stephen A. Goldstein, Alexander L. Greninger, Amy L. Hartman, Brenda G. Hogue, Stacy M. Horner, Peter J. Hotez, Jae U. Jung, Jeremy P. Kamil, Stephanie M. Karst, Lou Laimins, Seema S. Lakdawala, Igor Landais, Michael Letko, Brett Lindenbach, Shan-Lu Liu, Micah Luftig, Grant McFadden, Andrew Mehle, Juliet Morrison, Anne Moscona, Elke Mühlberger, Joshua Munger, Karl Münger, Eain Murphy, Christopher J. Neufeldt, Janko Z. Nikolich, Christine M. O'Connor, Andrew Pekosz, Sallie R. Permar, Julie K. Pfeiffer, Saskia V. Popescu, John G. Purdy, Vincent R. Racaniello, Charles M. Rice, Jonathan A. Runstadler, Martin J. Sapp, Rona S. Scott, Gregory A. Smith, Erin M. Sorrell, Emily Speranza, Daniel Streblow, Scott A. Tibbetts, Zsolt Toth, Koenraad Van Doorslaer, Susan R. Weiss, Elizabeth A. White, Timothy M. White, Christiane E. Wobus, Michael Worobey, Satoko Yamaoka, Andrew Yurochko

Volume 98, no. 1, e01791-23, 2024, <https://doi.org/10.1128/jvi.01791-23>. Page 3, line 7: “elevating SARS-CoV-1 to a select agent in 2009” should read “elevating SARS-CoV-1 to a select agent in 2012.”

The CDC proposed adding SARS-CoV-1 to the Select Agent registry in a federal notice on 13 July 2009 (<https://www.federalregister.gov/documents/2009/07/13/E9-16536/possession-use-and-transfer-of-select-agents-and-toxins-proposed-addition-of-sars-associated>). This notice of proposed rulemaking explicitly states that compliance with the proposed amendment would require anyone possessing SARS-CoV-1 to obtain current or amended registration with the HHS Select Agent Program and acknowledged that registration is a time-consuming and potentially costly process. Contemporaneous sources demonstrate that the research impact was anticipated in 2009 ([https://absa.org/wp-content/uploads/2017/01/090911DHHS\\_SARS\\_Select\\_Agent\\_Comments.pdf](https://absa.org/wp-content/uploads/2017/01/090911DHHS_SARS_Select_Agent_Comments.pdf) and <https://www.cidrap.umn.edu/sars/cdc-proposes-list-sars-virus-select-agent>) and had already had a negative impact on SARS-CoV-1 research (S. Matthews, *Nat Med* 18:1722, 2012, <https://doi.org/10.1038/nm1212-1722> and <https://www.cidrap.umn.edu/anthrax/changes-select-agent-rules-concern-public-health-labs>) by the time its addition to the Select Agent registry went into effect on 4 December 2012 (<https://www.federalregister.gov/documents/2012/10/05/2012-24389/possession-use-and-transfer-of-select-agents-and-toxins-biennial-review>).
