

## Cinnamaldehyde Inhibits the Function of Osteosarcoma by Suppressing the Wnt/ $\beta$ -Catenin and PI3K/Akt Signaling Pathways [Retraction]

Huang Y, Chen J, Yang S, et al. *Drug Des Devel Ther.* 2020;14:4625–4637.

We, the Editor and Publisher of the journal *Drug Design, Development and Therapy*, have retracted the following article.

Following publication of the article, concerns were raised about the duplication of images from Figures 4 and 6. Specifically,

- Images for Figure 4F, MG63, control and 80  $\mu$ M, have been duplicated.
- Images for Figure 4J, MG63, 12H, control and 100  $\mu$ M, have been duplicated.
- Images for Figure 6D, Osteosarcoma, Blank (x 200) and 75 mg/kg (x 200) have been duplicated.
- Images for Figure 6E, p-Akt (Ser473), 50 mg/kg (x 400) and 75 mg/kg (x 400) have been duplicated.

The authors responded to our queries but were unable to provide a satisfactory explanation for the duplicated images or provide satisfactory data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article and the authors were notified of this.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

### Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
