

Molecular simulations and NMR reveal how lipid fluctuations affect membrane mechanics

Milka Doktorova,* George Khelashvili, Rana Ashkar, and Michael F. Brown*

(Biophysical Journal 122, 984–1002; March 21, 2023)

In the Supporting Material for the originally published version of this article, Equations S8 and S11 contained minor misprints. In the second paragraph of the “Orientational averaging of relaxation rates” section (page 23), the equation at the end of the third sentence also had a minor misprint. The Supporting Material has now been updated online to correct these misprints.
