The authors regret that the formulas for normalized urea excretion rate (nuer) and normalized free water balance 3 (nfwb3) are incorrectly displayed in Figure 2 and supplementary material.

These are pure transmission errors and are limited to the presentation of the formulas in the figure and supplementary methods file. All calculations were done with the correct formulas.

The corrected Figure 2 is shown here. The corrected formulas of Supplementary Methods S2 can be found using the Supplementary Materials link below.

The authors would like to apologize for any inconvenience caused.
