An image was inadvertently reused in Figure 8D. A portion of the same image appears in both the “Nestin-*Clstn3*” and “+ *Clstn3* Full (rescue)” panels of the “SLM” row. An incorrect image was also supplied for the “Ctrl” panel of GAD65-immunostained neurons of the SR layer in figure 9C. Corrected versions of both figures have been provided. The authors state the results and findings presented in the article remain unchanged.

ADDITIONS AND CORRECTIONS:
