

**Coexistence of Cecal duplication cyst and Meckel's diverticulum presenting as intestinal obstruction: a rare case report: Retraction**

We have been made aware that the article, "Single-cell and whole-transcriptome sequencing of lymph node metastasis-related gene signature: A large-scale pan-cancer cohort, machine learning and experimental study"<sup>[1]</sup>, was recently published in another journal due to unintentional duplicate submission by different co-authors. The paper is therefore retracted from *Annals of Medicine and Surgery*.
