

Correction for Pérez-Viso et al., “A long-term survey of *Serratia* spp. bloodstream infections revealed an increase of antimicrobial resistance involving adult population”

Blanca Pérez-Viso, Marta Hernández-García, Concepción M. Rodríguez, Miguel D. Fernández-de-Bobadilla, María Isabel Serrano-Tomás, Ana María Sánchez-Díaz, José Avendaño-Ortiz, Teresa M. Coque, Patricia Ruiz-Garbajosa, Rosa del Campo, Rafael Cantón

Volume 12, no. 2, e02762-23, 2024, <https://doi.org/10.1128/spectrum.02762-23>. We have detected that Table S2 in the supplemental material contains errors (percentages and *P* values). These errors do not affect the article itself, but some of the mistaken percentages of Table S2 were referred to inaccurately.

Page 4, Results: “Overall, tobramycin was the aminoglycoside...” should read “... from this group (47.5%).”

“Carbapenems (imipenem, meropenem, and ertapenem) were...” should read “... greatest rate of susceptibility (96.5%, 95.8%, and 93.6%, respectively).”

Page 7, Discussion: “This is also the studied period with the highest number of *Serratia* spp. isolates...” should read “... cefotaxime (26.9%), and cefepime (16.4%) ...”

Supplemental material: Table S2 should appear as shown in the revised supplemental file in this author correction.

ADDITIONAL FILES

The following material is available [online](#).

Supplemental Material

Table S2 (Spectrum02425-24-S0001.docx). Antimicrobial resistance rates in *Serratia* BSI isolates over years. Data expressed as percentage of resistant strains in each period. Meropenem results are regarding 118 isolates.
