(Molecular Therapy: Oncolytics 18, 58–69; September 2020)

This article has been retracted at the request of the editor-in-chief. The corresponding author (H.L.) submitted a request to correct Figures 2, 3, and 4 of this article. Upon further investigation, similarities were found between images within this article. Similarities were also found between images in this article and articles by different authors in *Molecular Cancer* (Wang et al., 2017, Mol. Cancer 16, 61, <https://doi.org/10.1186/s12943-017-0627-6>), *OncoTargets and Therapy* (Zhou et al., 2019, Onco. Targets Ther. 27, 2289–2297, <https://doi.org/10.2147/OTT.S183625>), and *Scientific Reports* (Zhu et al., 2016, Sci. Rep. 6, 21549, <https://doi.org/10.1038/srep21549>). Image analysis conducted by the editorial office confirmed findings of image duplication in identical or altered fashion involving Figures 2D, 3D, and 4A of the original *Molecular Therapy Oncology* article. Given these issues, the editors have lost faith in the findings presented in this article. This reuse of data without appropriate attribution represents a severe abuse of the scientific publishing system. The original notice of retraction was undeliverable to authors Xiaonong Wang, Yuwen Liu, Yan Yang, and Qingquan Liu.
