Allotype-related sequence variations of the heavy chain of rabbit immunoglobulin G

By J. W. PRAHL and R. R. PORTER

Volume 107 (1968)

p. 757, column 1, Fig. 2: the second pair of half-cystine residues from the left should not be joined by a bond

The catalase-hydrogen peroxide system

Role of sub-units in the thermal deactivation of bacterial catalase
in the absence of substrate

By PETER JONES and A. SUGGETT

Volume 108 (1968)

p. 835, column 2, equation (2): *for* $-d[E_a]/dt = k[E_0]^{0.28}[H^+]^{0.25}$ *read*
 $-d[E_a]/dt = k_d[E_0]^{0.28}[H^+]^{0.25}$
