ERRATUM

On page 371 in the article by Yoon et al. (*Annals of Surgery*, September 1998), Figure 4, which printed as black and white, should have been printed in color. The figure as it should have appeared is featured below. The printer extends its sincere apologies to the authors and the readership for this error.

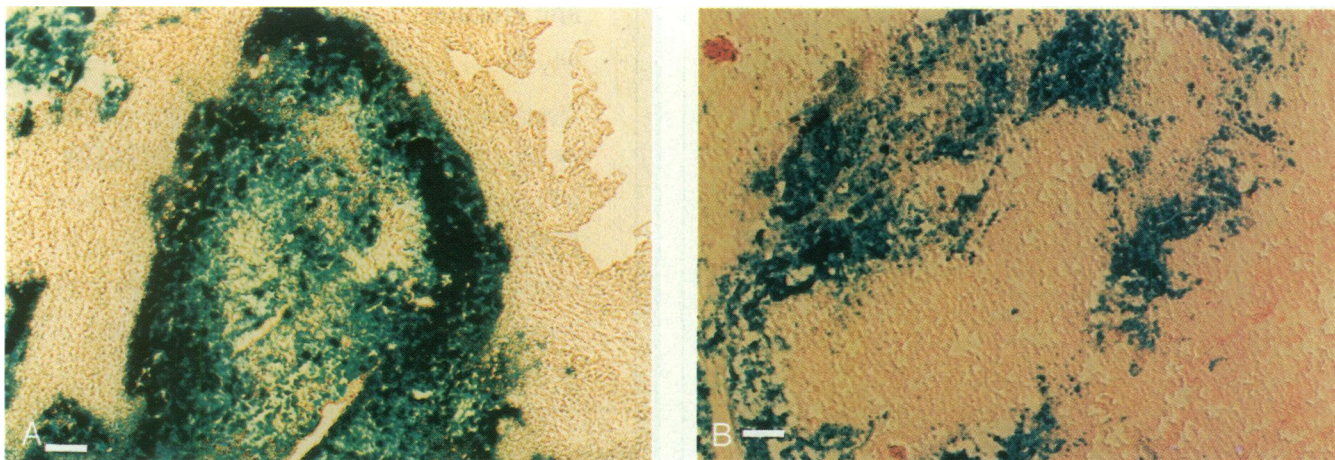

Figure 4. LacZ expression in HT29 flank tumors after hrR3 inoculation. HT29 cells were injected in the flanks of nude mice. On posttumor injection day (PTD) 7, 10, and 13, mice received intratumoral injections of hrR3. Mice were sacrificed on PTD 14 and 54, and tumor sections were stained for lacZ expression. Tumor sections from mice sacrificed on PTD 14 (Fig. 4A) and PTD 54 (Fig. 4B) are shown. Blue-staining cells are positive for lacZ expression. Bar = 100 μ m.
