

CORRIGENDUM

Volume 95, May–August 1980)

In the paper by COX, TUIE and MUNDY (GENETICS 95: 589–609), “pedigree” brackets were omitted in Table 4, p. 602. The corrected table is:

TABLE 4

The phenotypes expected of clones formed by matings of a [psi⁺] kar strain with either SUQ5 [psi⁻] or a SUQ5 pnm strain

	[psi ⁻] SUQ5 (α, ade2-1, ura3-1)	×	[psi ⁺] kar1 (a, ade2-1, leu1)	×	pnm SUQ5 (α, ade2-1, ura3-1)
1. Haploid:	white, ADE ⁺ (α, LEU ⁺ , ura ⁻)		red, ade ⁻ (a, leu ⁻ , URA ⁺)		red, ade ⁻ (α, LEU ⁺ , ura ⁻)
2. Heterokaryon:	pink + white + red			pink + red	
3. Rare Diploid:	white, ADE ⁺ (2n, LEU ⁺ , URA ⁺)
