

## Retraction

### **IgG transcytosis and recycling by FcRn expressed in MDCK cells reveals ligand-induced redistribution**

**T.S.Ramalingam, Scott A.Detmer, W.Lance Martin and Pamela J.Bjorkman**

*The EMBO Journal*, **21**, 590–601, 2002

We wish to inform you that we have been unable to reproduce a result described in the above paper. Specifically, we do not observe ligand-induced redistribution of FcRn expressed in MDCK cells when we compare confocal images of the distribution of FcRn–GFP in cells incubated in the presence or absence of IgG ligand (D.B.Tesar, N.E.Tiangco, S.A.Detmer and P.J.Bjorkman, unpublished results). We are in the process of repeating the other experiments described in the paper and cannot yet comment on their reproducibility, but as ligand-induced redistribution was the focus of the paper and this result cannot be replicated, we wish to retract the paper now. We deeply regret any inconvenience our publication of this result has caused for others.

The first author of this paper (T.S.R.), who performed most of the experimental procedures and data analysis, has chosen not to be associated with this retraction.

## Corrigendum

### **Crystal structure of human 53BP1 BRCT domains bound to p53 tumour suppressor**

**Dean J.Derbyshire, Balaku P.Basu, Louise C.Serpell, Woo S.Joo, Takayasu Date, Kuniyoshi Iwabuchi and Aidan J.Doherty**

*The EMBO Journal*, **21**, 3863–3872, 2002

We (the authors) acknowledge that a small number of sentences in our article describing the structure of the BRCT domains were duplicated from the paper of Williams *et al.* (*Nat. Struct. Biol.*, **8**, 838–842, 2001). We wish to apologize to Williams *et al.* for this unfortunate occurrence and we accept that these introductions should not have been included in our paper.
