

Errata

G.N. ABRAHAM (1978) Human triclonal anti-IgG gammopathy. I. Iso-electric focusing characteristics of the IgG, IgA and IgM anti-IgG and their heavy and light chains. *Immunology*, 35, 429-438.

Figures 2 and 5 were transposed in this paper although the legends were in the correct place.

R.R. FREEMAN & C.R. PARISH (1978) Spleen cell changes during fatal and self-limiting malarial infections of mice. *Immunology*, 35, 479-484.

A duplicate of Figure 4 was printed in place of Figure 3 which is shown below.

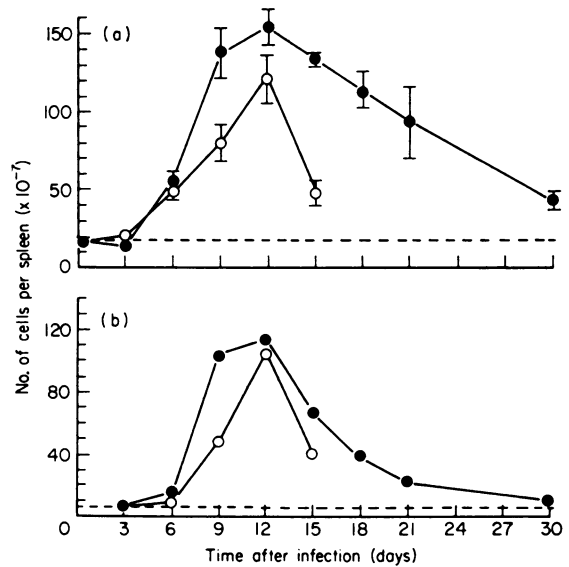

Figure 3. Changes in the total numbers of (a) nucleated cells and (b) normoblasts in the spleens of mice during *P. yoelii* (●) and *P. berghei* (○) infection.
