

CORRECTION

Vol. 127: 1030–1043, 2001

Thimm O., Essigmann B., Kloska S., Altmann T., and Buckhout T.J. Response of Arabidopsis to Iron Deficiency Stress as Revealed by Microarray Analysis.

On page 1041, column two, the last line before Equation 3 should read as follows: “the *REL* in control (*REL_c*) and test (*REL_t*) arrays:..” and the first line after the equation should read: “An *IF* > 0 indicates induction and *IF* < 0 indicates repression.”

Throughout the text, “*IF* < -0.5 or > 1” was incorrectly written as: “*IF* > ±1.”

The last sentence in the legends to Figures 3, 4, 5, and 6 should read as follows:

“Vertical lines separate different experiments (1, 3, and 7 d of -Fe) and indicate a change in *IF* of ±0.5.”

On page 1039, second column, the last sentence of the first paragraph should read, “In agreement with finding in tobacco, adenine phosphoribosyltransferase was not induced in roots and shoots under Fe-deficiency stress.”

On page 1039, second column, second paragraph, seventh line down, “*IF* as calculated here” should be replaced with “gene expression level.”
