

Errata

There was an error in the McEwen and Reilly article entitled “State Legislative Efforts to Regulate Use and Potential Misuse of Genetic Information” (51:637–647). Contrary to the statements made on pages 638, 640, and 648, the Wisconsin legislation that was discussed, 1991 Wisconsin Act 117, does *not* regulate genetic discrimination in insurance. It regulates only employment. The insurance provisions were considered during the legislative process; however, they were omitted from the final version of the bill signed by the governor in March 1992.

There was an error in the article entitled “Estimation of Hardy-Weinberg and Pairwise Equilibrium in the Apolipoprotein AI-CIII-AIV Gene Cluster,” by Haviland et al. (49:350–365). In the tables, Results, and Discussion, the labels for the two polymorphisms—*XmnI*(1) and *XmnI*(2)—identified by the enzyme *XmnI* were inadvertently reversed. The revised figure 3, shown below, depicts the correct interpretation of the results.

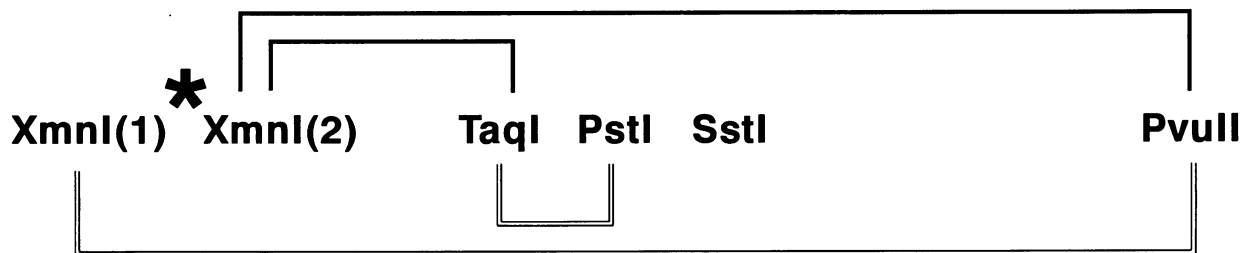

Figure 3 Genetic structure of apo AI-CIII-AIV region. The asterisk (*) signifies departure from HW equilibrium; the single line (—) signifies composite diallelic disequilibrium; and the double line (═) signifies triallelic disequilibrium.
