CORRECTIONS

Haemodialysis/Transplantation Programme

In the article "Statistical Approach to Planning an Integrated Haemodialysis/Transplantation Programme" by Dr. Farrow *et al.*, (19 June, p. 671) the first five numbers relating to patients surviving in Figure 3 should have read 28, 22, 19, 17, 16 and not 19, 18, 17, 17, 11, as stated.

Humidity in Hospital

We regret two printing errors in the letter on this subject by Dr. Douglas Needham (10 July, p. 114). The word "even" at the end of the fifth line should have read "ever", and the last sentence should have read "I suggest that any hair hygrometer needs constant checking; the whirling wet bulb instrument is the one of choice." The word "air" was wrongly printed for "hair."

Migraine

In the article by Dr. Marcia Wilkinson on "Migraine—Treatment of Acute Attack" (26 June 1971, p. 754) the penultimate sentence of the paragraph headed Antiemetic Drugs should have read: "Cyclizine, hydrochloride, 50 mg by injection (Valoid), prochlorperazine 5 mg (Stemetil), or other antiemetics can be used" and not "thiethylperazine."
