ERRATA

The following corrections apply to the articles in the December 1981 issue:

p. 911. Table III. In the column indicating virus quantities in secretions, the last figure should be: >1,000.

p. 979. Table I. The fifth compound in the last column should be: 1,2 Dichloroethane.

p. 981. The fifth sentence of the paragraph on aromatic hydrocarbons should read: It is in paints, varnishes, glues, enamels, and lacquers.

p. 1030. The equation describing indoor concentration of contaminants should read:

$$C_s = \frac{V_o C_o + N_p}{\frac{V_r E}{100} + V_e + N_s}$$

p. 1045. The removal constant and ventilation constant are incorrectly represented in the text by T_r and T_v , respectively. They should be: τ_r and τ_v , as in Figure 6.
