Evolutionary Relationship between the TonB-Dependent Outer Membrane Transport Proteins: Nucleotide and Amino Acid Sequences of the *Escherichia coli* Colicin I Receptor Gene

CYNTHIA D. NAU AND JORDAN KONISKY

Department of Microbiology, University of Illinois, 131 Burrill Hall, 407 South Goodwin Avenue, Urbana, Illinois 61801

Volume 171, no. 2, p. 1043, Fig. 1: Further examination of the primary sequence data and resequencing of some fragments led to the identification of three errors in the published sequence of the *cir* gene. The corrected nucleotide sequences and derived amino acid sequences for the regions affected by these errors are shown below. These corrections do not change the overall conclusions of the paper.
