Honda et al. Vol. 140, No. 6, March 1998. Pages 1383-1393.

The underlined portion of the text below indicates the corrected sequence which appeared in the Materials and Methods on p. 1384.

Multiple tissue Northern blots I and II were purchased from CLONTECH Laboratories and hybridization was performed using a <sup>32</sup>P-labeled oligonucleotide probe (5'-<u>GCGACTATGTGT</u>-<u>CAGAGAGCCGA</u>-3') specific to actinin-4, as described previously (Sambrook et al., 1989).
