Due to a typesetting error, the symbols for rate constants in Table II were printed incorrectly. The corrected table appears below:

*In Model 1Ca, $k_{RC1} = k_{on}$; $k_{C1R} = k_{off}$. In Model 2Ca–Model 5Ca, n independent subunits bind Ca^{2+} with the rate constants k_{on} and k_{off}. The rate constants in R ↔ C1 ↔…↔ Cn… are then: $k_{RC1} = n \times k_{on}$; $k_{C1C2} = (n - 1) \times k_{on}$;…$k_{Cn-1Cn} = k_{on}$; $k_{C1R} = k_{off}$; $k_{C2C1} = 2 \times k_{off}$;…$k_{CnCn-1} = n \times k_{off}$.
