

Dermacase

Can you identify this condition?

Danielle Gordon Benjamin Barankin MD FRCPC

A 6-year-old boy presents with scaling and clumped hair on his scalp. His parents are concerned that he might have an infection. He has a sister who suffers from psoriasis.

The most likely *clinical* diagnosis is

1. Psoriasis
2. Seborrheic dermatitis
3. Tinea capitis
4. Tinea amiantacea
5. Impetigo
