

Colon Cancer Follow-Up Sheet

To begin the chart, fill in the date of diagnosis. Add the years/months in the first column to the date of diagnosis to obtain target dates. Record visits, test dates, and CEA values in the rows corresponding to each target date as they are completed. Darkened rows indicate that a particular procedure is not required at that time. Programmable follow-up sheet available at www.asco.org/guidelines.

¹ Carcinoembryonic antigen (CEA) testing is not recommended *during* the administration of adjuvant chemotherapy.

² As guidelines suggest 3 to 6 months for counseling visits, optional dates are marked with (opt).

³ Recommended for high-risk patients.

⁴ Acceptable to wait 3 years for follow-up if the pre- or perioperative colonoscopy examined the *entire colon*.
