

Correction. In the article "Phosphorylation by protein kinase C of a 20-kDa cytoskeletal polypeptide enhances its susceptibility to digestion by calpain" by S. Pontremoli, E. Melloni, M. Michetti, B. Sparatore, F. Salamino, O. Sacco, and B. L. Horecker, which appeared in number 2, January 1987, of *Proc. Natl. Acad. Sci. USA* (84, 398–401), the authors request that the following be noted. The statement that concludes the *Discussion* on p. 400 is incorrect. It should read "But, to our knowledge, the phosphorylation by protein kinase C of a mammalian protein acting as a signal for its proteolysis has not been reported previously."
